## Unlock Your Research Potential with Elabscience® Recombinant Proteins!

**LIMITED TIME  
25% OFF**

**All Recombinant Proteins.**

Valid from 15/01/26 to 30/04/2026

### Exclusive Limited-Time Offer Just for You!

Accelerate your discoveries with premium recombinant proteins at special discounts - available now for a limited period! Whether you're investigating cell signaling pathways, immune mechanisms, protein interactions, or organoid development, Elabscience® delivers high-purity, bioactive proteins to power your experiments.

### Why Choose Elabscience® Recombinant Proteins?

Four Optimized Expression Systems:

**Yeast - Baculovirus-Infected Insect Cells - E. coli - Mammalian Cells**

Each platform is tailored for specific protein characteristics, ensuring optimal solubility, post-translational modifications, and functional performance.

### Comprehensive Product Portfolio

Explore our extensive catalog including:

- Cytokines & Growth Factors
- Kinases & Regulatory Proteins
- Immune Response Proteins
- Membrane Proteins & Receptors
- Structural & Adhesion Molecules

### Can't Find Your Target Protein?

**Leverage our Custom Protein Expression Service!**

Our dedicated team of experienced scientists and cutting-edge platform ensures:

- High success rates through system optimization
- End-to-end solutions: cloning, expression, purification, and functional validation
- Flexible scales from research-grade to bulk production

### Act Now - Limited Quantities Available!

- Apply for a **large discount of 25% off**
- Browse our **6,000+** recombinant protein portfolio
- Submit custom project inquiries
